Great news!

Insulin pricing is now more consistent.

Our new insulin program offers select insulins at one consistent copay during the deductible, initial coverage, and gap coverage benefit phases. The price will not change if you enter the coverage gap. See the table on the reverse side for details.

We offer preferred insulin products

Different insulin products work in similar ways to lower your blood sugar level. You may be able to save more on your insulin by switching to one of our preferred products.

Switching is easy

Just follow these simple steps

- Review the 2021 Blue Care Network insulin changes.
- Take a list of the current drugs you're taking to your doctor along with this brochure.
- Talk to your doctor about the changes to your Blue Care Network drug list.
- If your doctor agrees to an alternative insulin, ask your doctor to write you a new prescription.
- Take the prescription to your local pharmacy.

The formulary, pharmacy network, and/or provider network may change at any time. You will receive notice when necessary.

For more information

This is not a complete list of drugs covered by our plan. For a complete listing, please call Customer Service at **1-800-450-3680** and TTY users call 711 or visit **www.bcbsm.com/medicare**.
